

ALM-2712

GPS Filter-LNA-Filter Front-End Module

AVAGO
TECHNOLOGIES

Data Sheet

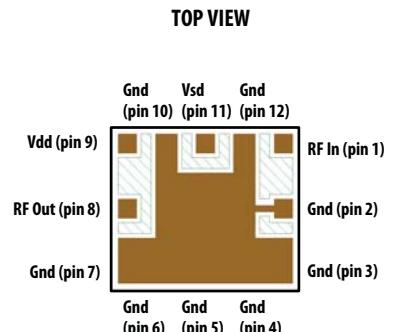

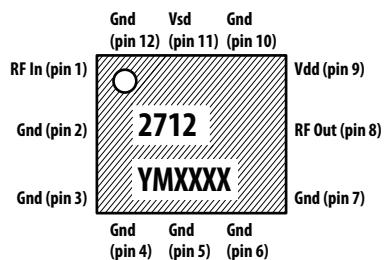

Description

Avago Technologies' ALM-2712 is an ultra low-noise GPS front-end module that combines a low-noise amplifier (LNA) with GPS FBAR filters. The LNA uses Avago Technologies' proprietary GaAs Enhancement-mode pHEMT process to achieve high gain with very low noise figure and high linearity. Noise figure distribution is very tightly controlled. A CMOS-compatible shutdown pin is included either for turning the LNA on/off, or for current adjustment. The integrated filter utilizes an Avago Technologies' leading-edge FBAR filter for exceptional rejection at Cellular, DCS, PCS and WLAN band frequencies. Bypass functionality with an external RF switch is possible with separate RF switching.

The low noise figure and high gain, coupled with low current consumption make it suitable for use in critical low-power GPS applications or during low-battery situations.

Component Image

Surface Mount (3.0 x 2.5 x 1) mm³ 12-lead MCQB

Note:
Package marking provides orientation and identification
"2712" = Product Code
"Y" = Year of manufacture
"M" = Month of manufacture
"XXXX" = Last 4 digit of lot number

Features

- Very Low Noise Figure: 1.26 dB typ.
- Exceptional Cell/DCS/PCS/WLAN-Band rejection
- Advanced GaAs E-pHEMT & FBAR Technology
- Low external component count.
- CMOS compatible shutdown pin (SD)
- ESD: > 3kV at RFin pin
- Adjustable bias current via single external resistor/voltage
- Useable down to 1.8V supply voltage
- Small package dimension: 3.0(L)x2.5(W)x1(H) mm³
- Meets MSL3, Lead-free and halogen free

Specifications (Typical performance @ 25°C)

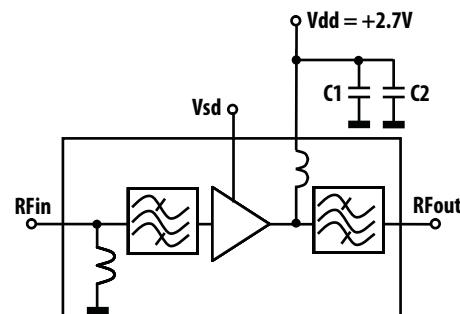

At 1.575GHz, Vdd = 2.7V, Idd = 7.5mA

- Gain = 14.2 dB
- NF = 1.26 dB
- IIP3 = +5 dBm, IP1dB = +2 dBm
- S11 = -9 dB, S22 = -12 dB
- Low-Band Rejection (824 – 928MHz): 89 dBc
- High-Band Rejection (1710 – 1980MHz): 80 dBc
- WLAN-Band Rejection (2400 – 2500MHz): 72 dBc

Application

- GPS Front-end Module

Application Circuit

Attention: Observe precautions for handling electrostatic sensitive devices.

RF In (Pin 1) to GND: ESD Human Body Model = 3 kV

All other Pins : ESD Machine Model = 50 V

: ESD Human Body Model = 300 V

Refer to Avago Application Note A004R:
Electrostatic Discharge, Damage and Control.

Absolute Maximum Rating^[1] T_A=25°C

| Symbol | Parameter | Units | Absolute Max. |
|---------------------|---|-------|---------------|
| Vdd | Device Drain to Source Voltage ^[2] | V | 3.6 |
| Idd | Drain Current ^[2] | mA | 20 |
| P _{in,max} | CW RF Input Power (Vdd = 2.7V, Idd = 7.5mA) | dBm | 15 |
| P _{diss} | Total Power Dissipation ^[4] | mW | 72 |
| T _j | Junction Temperature | °C | 150 |
| T _{STG} | Storage Temperature | °C | -65 to 150 |

Thermal Resistance^[3] (Vdd = 2.7V, Idd = 7.5mA), θ_{jc} = 92°C/W

Notes:

1. Operation of this device in excess of any of these limits may cause permanent damage.
2. Assuming DC quiescent conditions.
3. Thermal resistance measured using Infra-Red measurement technique.
4. Board (module belly) temperature T_B is 25°C. Derate 10.87 mW/°C for T_B>143°C.

Electrical Specifications

T_A = 25°C, Freq = 1.575GHz, measured on demo board^[1] unless otherwise specified – Typical Performance^[1]

Table 1. Performance at Vdd = Vsd = 2.7V, Idd = 7.5mA (Rbias = 6.8k Ohm) nominal operating conditions

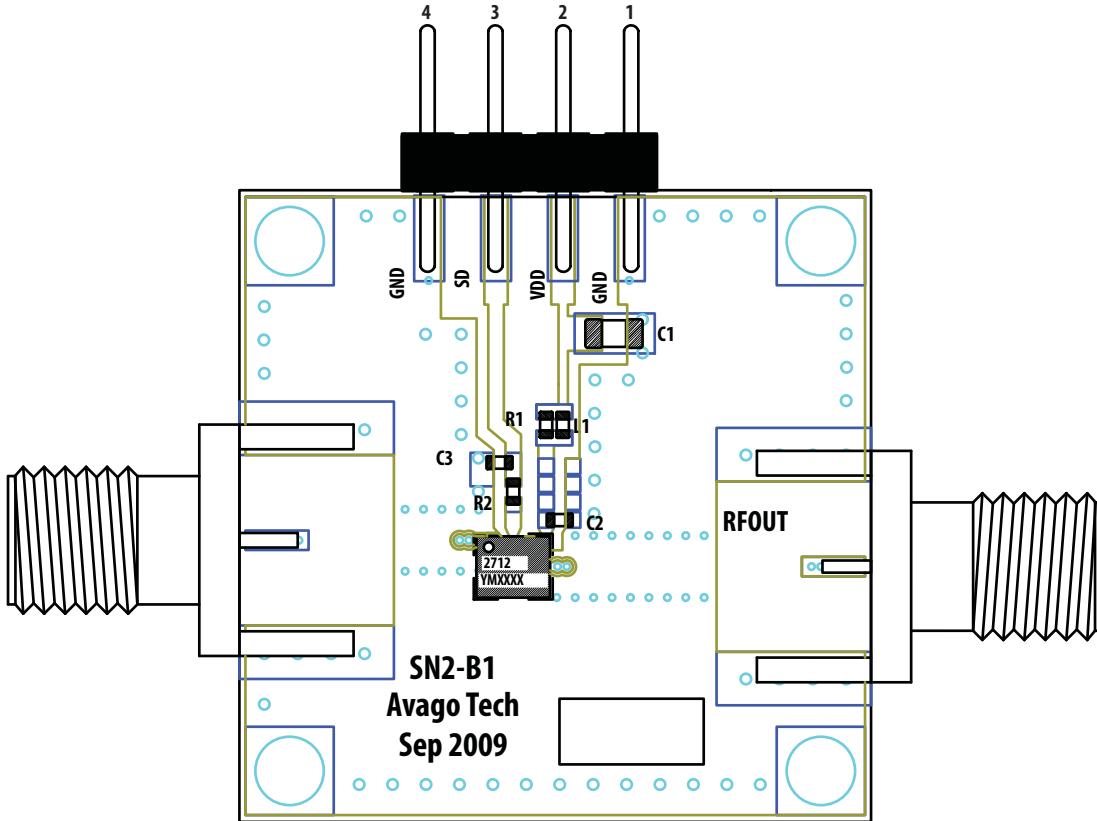

| Symbol | Parameter and Test Condition | Units | Min. | Typ | Max. |

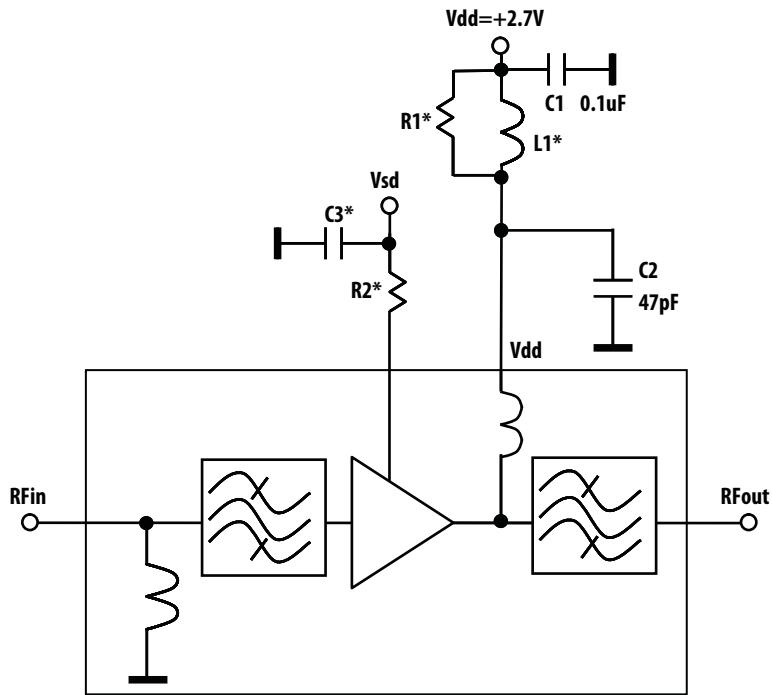

Figure 2. Application Circuit

* optional, see notes below

Notes:

- The ALM-2712 can be operated with supply voltage (Vdd) from 1.5V to 2.85V. Vsd can operate from 1V to Vdd.
- The module is fully matched at the input and output RF pins. The RFinput pin is connected directly to a shunt inductor to ground. As such a DC blocking capacitor is required if DC voltages are present. The RFoutput pin is already DC-blocked by the internal filter inside the module.
- Best noise performance is obtained using high-Q wirewound inductors. This circuit demonstrates that low noise figures are obtainable with standard 0402 chip inductors.
- C1 and C2 are bypass capacitors for RF and low frequency stability and linearity .
- L1 and R1 isolates the demoboard from external disturbances during measurement. It is not needed in actual application. Likewise, C3 mitigate the effect of external noise pickup on the Vsd line. This component are not required in actual operation. Minimal component operation is as shown in the schematic on page 1.
- Bias control is achieved by either varying the Vsd voltage with/ without R2, or fixing the Vsd voltage to Vdd and adjusting R2 for the desired current.

ALM-2712 module with differential output

A differential output can be implemented for the ALM-2712 using the schematic shown below. Suggested component values are listed in Table 3. C1, C2 and L1, L2 are to convert the single-ended output to differential outputs while C3, C4 and L3 provide matching to 100 ohm differential impedance.

**ALM-2712 Typical Noise Parameters at 25°C,
Freq = 1.575 GHz, Vdd = 2.7V, Idd = 7.5mA**

| Freq (GHz) | Fmin (dB) | GAMMA OPT | | |
|---------------|--------------|-----------|------|--------|
| | | Mag | Ang | Rn/50 |
| 1.575 | 1.14 | 0.084 | 44.1 | 0.1714 |

Notes:

The exceptional noise figure performance of the ALM-2712 is due to its highly optimized design. In this regard, the Fmin of the ALM-2712 shown above is locked down by the internal input pre-match. This allows the use of relatively inexpensive chip inductors for external matching.

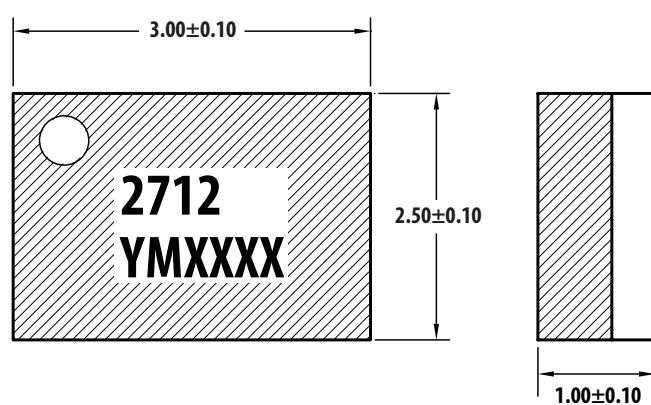

**ALM-2712 Typical Noise Parameters at 25°C,
Freq = 1.575 GHz, Vdd = 1.8V, Idd = 5mA**

| Freq (GHz) | Fmin (dB) | GAMMA OPT | | |
|---------------|--------------|-----------|------|--------|
| | | Mag | Ang | Rn/50 |
| 1.575 | 1.21 | 0.100 | 78.1 | 0.1780 |

Part Number Ordering Information

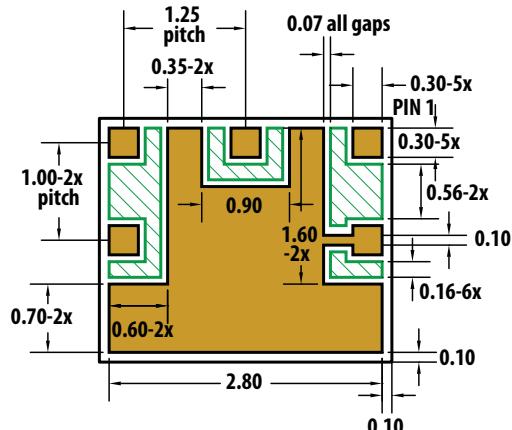

| Part Number | Qty | Container |
|---------------|------|----------------|
| ALM-2712-BLKG | 100 | Antistatic bag |
| ALM-2712-TR1G | 3000 | 13" Reel |

Package Dimensions

Top View

Side View

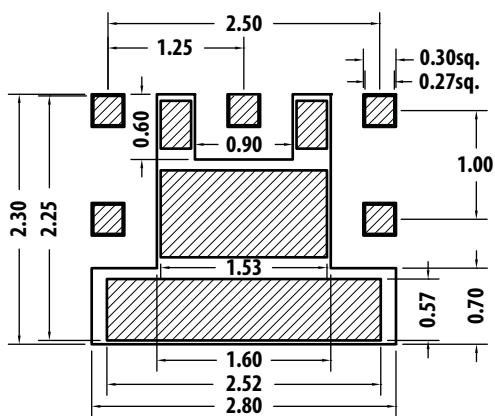

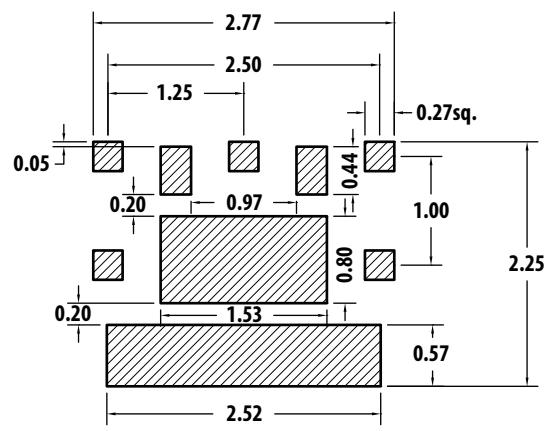

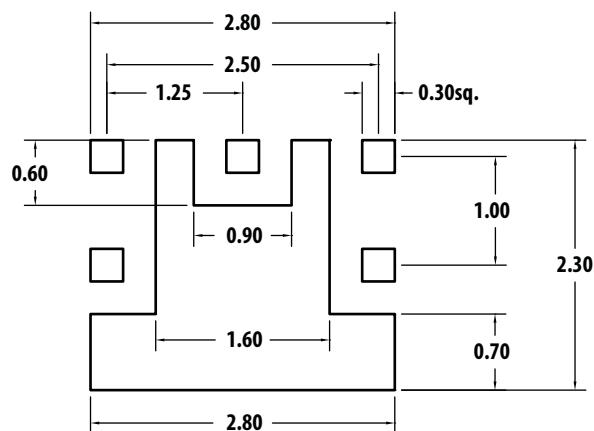

Bottom View

Notes:

1. All dimensions are in millimeters.
2. Dimensions are inclusive of plating.
3. Dimensions are exclusive of mold flash and metal burr.
4. Y refers to year, M refers to month & XXXX refers to last 4 digit of lot number.

PCB Land Patterns and Stencil Design

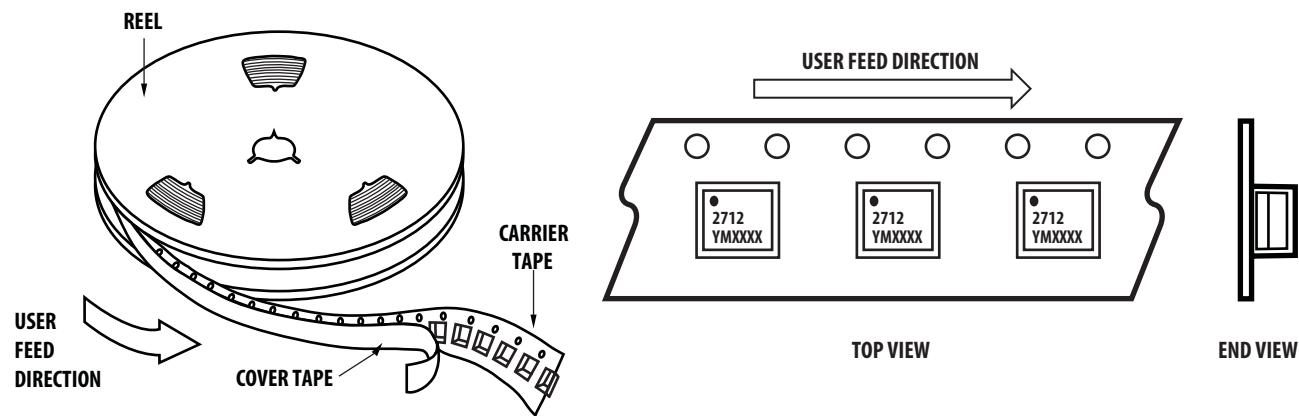

Combination of Land Pattern and Stencil Opening

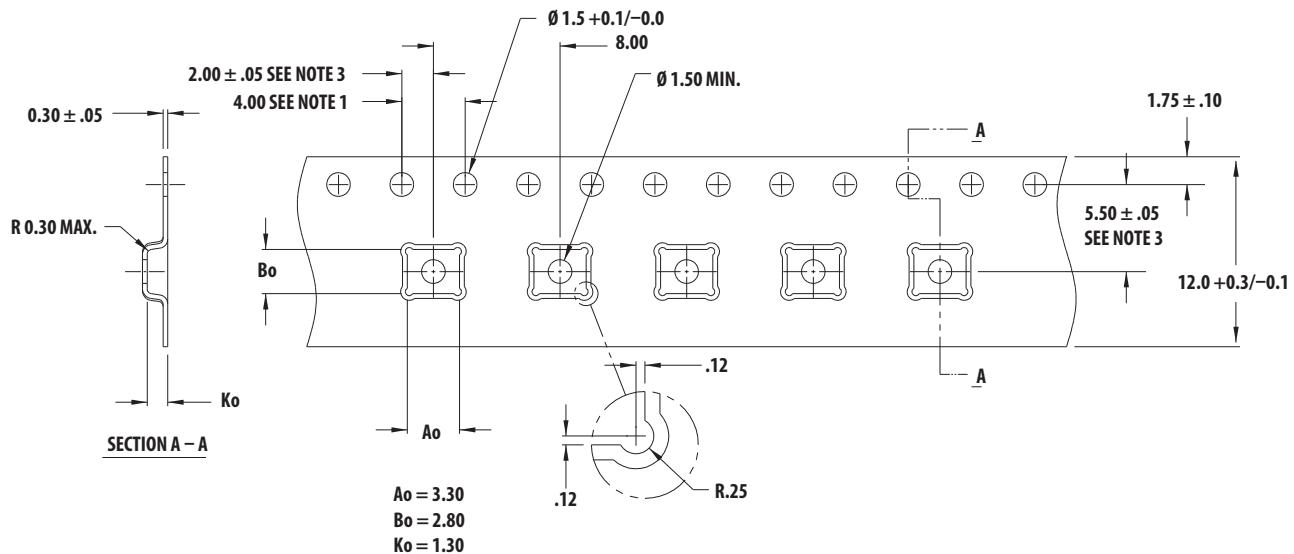

Notes:

1. All dimensions are in millimeters
2. Recommended stencil thickness is 4mils

Device Orientation

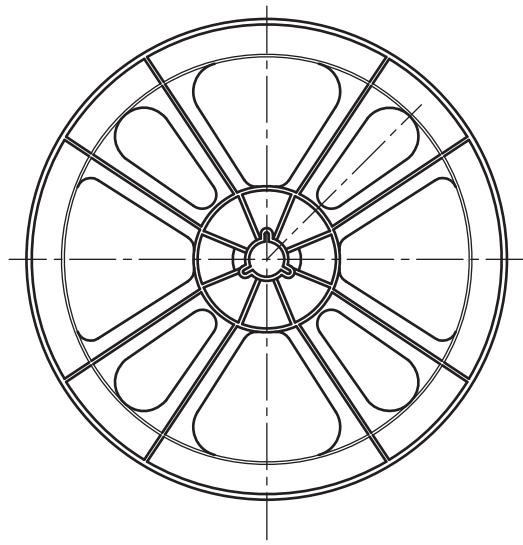

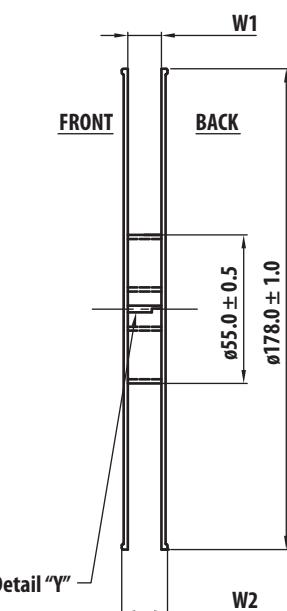

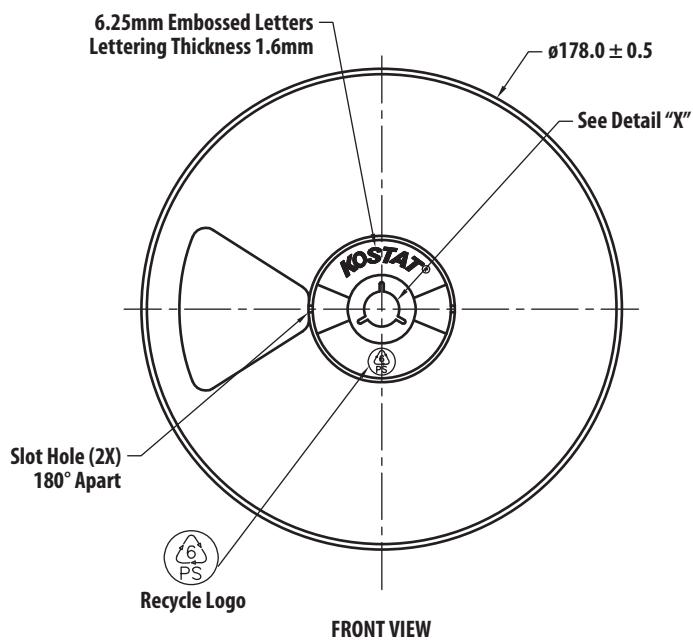

Tape Dimensions

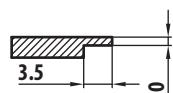

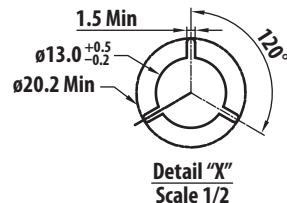

Notes:

1. All dimensions in mm
2. 10 sprocket hole pitch cumulative tolerance ± 0.2
3. Camber in compliance with EIA 481
4. Pocket position relative to sprocket hole measured as true position of pocket, not pocket hole
5. Ao and Bo are calculated on a plane at a distance "R" above the bottom of the pocket.

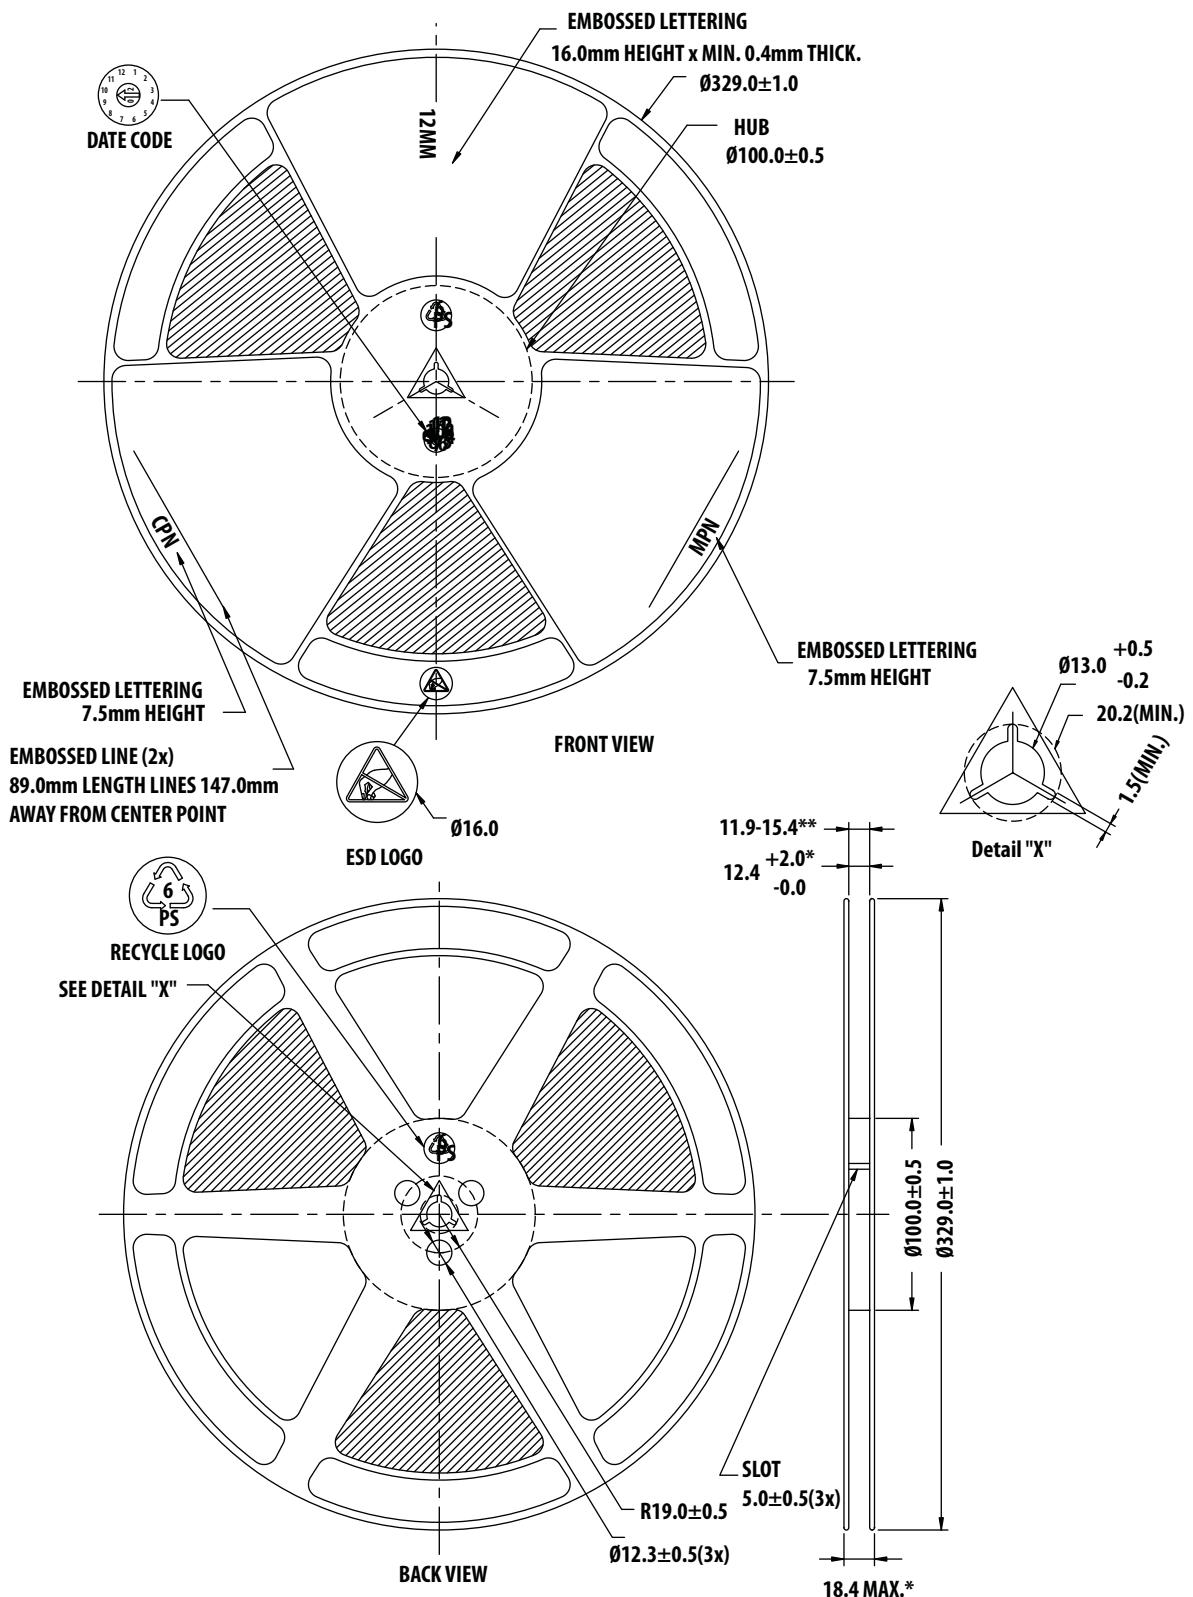

Reel Dimensions (7" reel)
