# FPF2895C 28 V / 5 A Rated Current Limit Switch with OVP and TRCB

## Features

- 28 V / 5 A Capability
- Wide Input Voltage Range: 4 V ~ 22 V
- Ultra Low On-Resistance
  - Typ. 27 mΩ at 5 V and 25 °C
- Adjustable Current Limit with external RSET
  - 500 mA ~ 5 A
- Selectable OVLO with OV1 and OV2 Logic Input
  - 5.95 V ± 50 mV
  - 10 V ± 100 mV
  - 16.8 V ± 300 mV
  - 23 V ± 460 mV
- Selectable ON Polarity
- Selectable Over-Current Behavior
  - Auto-Restart Mode
  - Current Source Mode
- True Reverse Current Block
- Thermal Shutdown
- Open Drain Fault FLAGB Output
- UL60950-1 & IEC 60950-1 Certification 5 A Max Loading
- Robust ESD Capability
  - 2 kV HBM & 1 kV CDM
  - 15 kV Air Discharge & 8 kV Contact Discharge under IEC 61000-4-2

## Description

The FPF2895C features a 28 V and 5 A rated current limit power switch, which offers Over-Current Protection (OCP), Over-Voltage Protection (OVP), and True Reverse Current Block (TRCB) to protect system. It has low On-resistance of typical 27 mΩ with WL-CSP can operate over an input voltage range of 4 V to 22 V.

The FPF2895C supports ±10% of current limit accuracy, over-current range of 500 mA to 2 A and ±5% of current limit accuracy, over-current range of 2 A to 5 A , flexible operations such as selectable OVP, selectable ON polarity and selectable OCP behavior, which can be optimized according to system requirements.

The FPF2895C is available in a 24-bump, 1.67 mm x 2.60 mm Wafer-Level Chip-Scale Package (WL-CSP) with 0.4 mm pitch.

## Applications

- Laptop, Desktop Computing and Monitor
- Power Accessories

## Ordering Information

| Part Number | Operating Temperature Range | Top Mark | Package                     | Packing Method |
|-------------|-----------------------------|----------|-----------------------------|----------------|
| FPF2895CUCX | -40°C – +85°C               | 3G       | 24-Ball, 0.4 mm Pitch WLCSP | Tape & Reel    |

FPF2895C — 28 V/5 A Rated Current Limit Switch with OVP and TRCB

## Pin Definitions

| Name    | Bump                       | Type         | Description   |
|---------|----------------------------|--------------|---|
| VIN     | C3, D3, D4, E3, E4, F3, F4 | Input/Supply | Switch Input and Device Supply  |
| VOUT    | C2, D1, D2, E1, E2, F1, F2 | Output       | Switch Output to Load   |
| NC      | A1                         | Dummy        | Recommended to connect to GND   |
| ON      | A2                         | Input        | Internal pull-down resistor of 1 MΩ is included. Active polarity is depending on POL state. <sup>(1)</sup>  |
| POL     | A4                         | Input        | Enable Polarity Selection. Internal pull-up of 1 MΩ is included. HIGH (or Floating): Active LOW<br>LOW: Active HIGH <sup>(1)</sup>  |
| FLAGB   | A3                         | Output       | Active LOW, open drain output indicates an over-current, under-voltage, over-voltage, or over-temperature state.  |
| ISET    | C1                         | Input        | A resistor from ISET to ground set the current limit for the switch. See below selection table 1.   |
| OC_MODE | B2                         | Input        | OCP behavior can be selected. Internal pull-up of 1 MΩ is included.<br>HIGH (or Floating): Auto-restart mode during over-current condition.<br>LOW: Current source mode during over-current condition. <sup>(1)</sup> |
| OV1     | B3                         | Input        | Over-Voltage Selection Input 1. Internal pull-up of 1 MΩ is included and see below selection table 2. <sup>(1)</sup>  |
| OV2     | C4                         | Input        | Over-Voltage Selection Input 2. Internal pull-up of 1 MΩ is included and see Table 2. <sup>(1)</sup>  |
| GND     | B1, B4                     | GND          | Device Ground   |

**Note:**

- To avoid external noise influence when floating, recommend to connect these pins to a certain level.

## Absolute Maximum Ratings

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

|                                    |   | Contact Discharge                        | 8                 |      |    |

**Note:**

- Measured using 2S2P JEDEC std. PCB.

## Recommended Operating Conditions

The Recommended Operating Conditions table defines the conditions for actual device operation. Recommended operating conditions are specified to ensure optimal performance to the datasheet specifications. ON does not recommend exceeding them or designing to Absolute Maximum Ratings.

| Symbol                             | Parameter                     | Min. | Max. | Unit |
|------------------------------------|-------------------------------|------|------|------|
| V <sub>IN</sub>                    | Supply Voltage                | 4.0  | 22.0 | V    |

### Note:

- Guaranteed by characterization and design, not production test.

### Setting Current Limit

FPF2895C current limit is set with an external resistor connected between I<sub>SET</sub> and GND. This resistor is selected using the following equation:

$$R_{SET}(k\Omega) = \left( \frac{4674.89}{I_{SET} \text{ mA}} \right)^{1/1.0326} \quad (1)$$

Resistor tolerance of 1% or less is recommended. 5% tolerance can be achieved only when ILIM is set to larger than 2A.

Table 1. ILIM vs. RSET Look-up Table

| RSET [kΩ] | ILIM [mA] |      |      |
|-----------|-----------|------|------|
|           | Min.      | Typ. | Max. |
| 8.75      | 450       | 500  | 550  |
| 7.35      | 540       | 600  | 660  |
| 6.30      | 630       | 700  | 770  |
| 5.55      | 720       | 800  | 880  |
| 4.95      | 810       | 900  | 990  |
| 4.45      | 900       | 1000 | 1100 |
| 4.06      | 990       | 1100 | 1210 |
| 3.73      | 1080      | 1200 | 1320 |
| 3.45      | 1170      | 1300 | 1430 |
| 3.21      | 1260      | 1400 | 1540 |

**Table 1. ILIM vs. RSET Look-up Table (Continued)**

| RSET [kΩ]           | ILIM [mA] |      |                     |
|---------------------|-----------|------|---------------------|
|                     | Min.      | Typ. | Max.                |
| 1.04 <sup>(4)</sup> | 4275      | 4500 | 4725                |
| 1.02                | 4370      | 4600 | 4830                |
| 0.99                | 4465      | 4700 | 4935                |
| 0.97                | 4560      | 4800 | 5040                |
| 0.96                | 4655      | 4900 | 5145                |
| 0.94                | 4750      | 5000 | 5250 <sup>(5)</sup> |

**Note:**

4. Passed UL&CB certification with max. 5 A output current.
5. 6 A absolute limit current value. See Figure 9. for protection timing diagram.

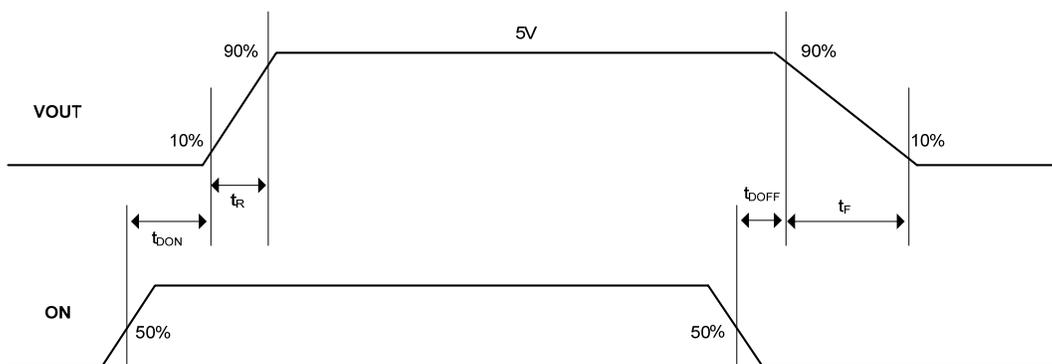

**Table 2. OVLO Level Selection**

| OV1             | OV2             | OVLO           |
|-----------------|-----------------|----------------|
| LOW             | LOW             | 23 V ±460 mV   |
| LOW             | HIGH (Floating) | 10 V ±100 mV   |
| HIGH (Floating) | LOW             | 16.3 V ±300 mV |
| HIGH (Floating) | HIGH (Floating) | 5.95 V ±50 mV  |

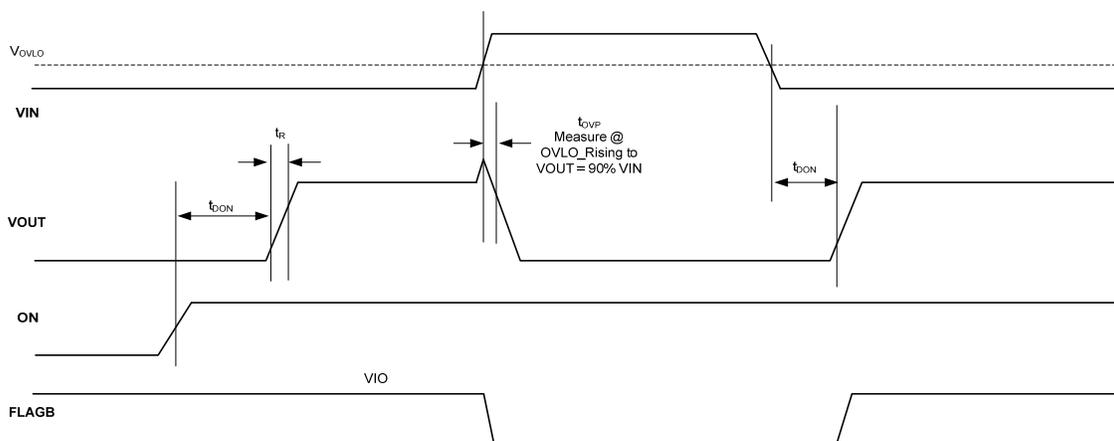

**Table 3. Device Enable Polarity Selection**

| POL             | ON             | Device State | ON Polarity |
|-----------------|----------------|--------------|-------------|
| LOW             | LOW (Floating) | OFF          | Active HIGH |
| LOW             | HIGH           | ON           |             |
| HIGH (Floating) | LOW (Floating) | ON           | Active LOW  |
| HIGH (Floating) | HIGH           | OFF          |             |
