### DESCRIPTION

SMA661AS is a product of the SMA Family (Silicon MMIC Amplifiers), it uses ST state-of-the-art SiGe BiCMOS technology. The excellent RF performances (17dB Gain and 1.4dB NF at 1.575GHz) and the few external component counts (just one capacitor) make the SMA661AS an ideal solution for GPS Low Noise Amplifier. SMA661AS embeds a power down function avoiding to use an external switch; in power down mode ( $V_{PD} \leq V_{PDL}$ ) the current consumption is about 10 nA. It is housed in ultra miniature SOT666 plastic package (1.65mm x 1.2mm x 1.57mm).
