5 STEP LOGARITHMIC DUAL LED DRIVER

Both of the TA7666P and the TA7667P consist of two inverting amplifiers, ten comparators and a reference voltage network.

Turn-on level intervals are 5dB, 5dB, 3dB, 3dB, in TA7666P, and are 2dB, 2dB, 2dB, 2dB in TA7667P.

It is suitable for stereo radio cassette applications because of dual type.

- Suitable for Stereo LED Driver
- Wide Supply Voltage Range : $V_{CC}=6\sim 12V$
- Low Quiescent Current : $I_{CCQ}=4mA(Typ.)$ at $V_{CC}=9V$
- Variable Voltage Gain Because of Inverting Amplifier.
- Easy Arrangement for Dual 10 LED's Driver by Series Connection of TA7666P and TA7667P

Unit in mm

MAXIMUM RATINGS ($T_a=25^{\circ}C$)

CHARACTERISTIC	SYMBOL	RATING	UNIT
Supply Voltage	V_{CC}	14	V
Output Current	I_O	30	mA
LED Drive Terminal Voltage (Note 1)	V_L	15	V
Power Dissipation (Note 2)	P_D	750	mW
Operating Temperature	T_{opr}	$-30\sim 75$	$^{\circ}C$
Storage Temperature	T_{stg}	$-55\sim 150$	$^{\circ}C$

Note 1. LED drive terminal voltage is maximum voltage at terminals from 3 to 7 and from 10 to 14.

2. Derated above $T_a=25^{\circ}C$ in the proportion of $6mW/^{\circ}C$.

(1) SETUP OF TURNING-ON LEVEL

As voltage gain of inverting amplifier depends on signal source resistance R_g , output resistance of prestage amplifier should be smaller than $10 \times R_{IN}$.

(Output resistance $\leq 10 R_{IN}$)

It is better to change R_{NF} for voltage gain adjustment, As 5th LED turn-on input level is $911.6 \text{ mV}_{\text{rms}}$ at $G_v=0\text{dB}$, voltage gain of inverting amplifier is set by the following equation.

$$\text{Voltage Gain} = 20 \log \frac{911.6 (\text{mV}_{\text{rms}})}{V_{\text{IN}}(\text{Input Voltage})} \quad (\text{dB})$$

(Example) Case of 5th LED turn-on at $300\text{mV}_{\text{rms}}$ input level

$$\text{Voltage Gain} = \frac{911.6}{300} \div 3 \quad (9.6\text{dB})$$

When R_{IN} is set up to be $10\text{k}\Omega$, R_{NF} becomes $30\text{k}\Omega$.

$$R_{NF} = 3 \times R_{IN} = 30\text{k}\Omega$$

Then each LED turn-on level is as follows.

IC	1st LED	2nd LED	3rd LED	4th LED	5th LED
TA7666P	48 -16dB	86 -11dB	152 -6dB	215 -3dB	$304\text{mV}_{\text{rms}}$ 0dB
TA7667P	121 -8dB	152 -6dB	192 -4dB	241 -2dB	$304\text{mV}_{\text{rms}}$ 0dB
