

TDA8139, TDA8139/D

Double (5.1 V and adjustable) voltage regulator with reset and disable functions

Features

- Input voltage range: 7 V to 18 V
- Output currents up to 750 mA
- Fixed Precision output 1 voltage: 5.1 V $\pm 2\%$
- Adjustable output 2 voltage: 2.8 to 16 V
- Output 1 with reset function
- Output 2 with disable function by TTL input
- Short-circuit protection at both outputs
- Thermal protection
- Low dropout voltage

Description

The TDA8139 and the TDA8139/D are monolithic dual positive voltage regulators designed to provide a fixed precision output voltage of 5.1 V and an adjustable voltage between 2.8 and 16 V for currents up to 750 mA.

An internal reset circuit generates a reset pulse when the voltage of OUTPUT1 drops below the regulated voltage value.

OUTPUT2 can be disabled via the TTL input.

Short-circuit and thermal protections are included in all versions.

$K_{O1,2}$	Output voltage thermal drift	$K_0 = \frac{\Delta V_0 \cdot 10^6}{\Delta T \cdot V_0}$ $T_J = 0 \text{ to } +125^\circ\text{C}$		100		ppm/ $^\circ\text{C}$
$I_{O1,2SC}$	Short circuit output current	$V_{IN1,2} = 7 \text{ V}$ $V_{IN1,2} = 16 \text{ V}^{(1)}$			1.6 1.0	A
V_{DISH}	Disable voltage high (OUT2 active)		2			V
V_{DISL}	Disable voltage low (OUT2 disabled)				0.8	V
I_{DIS}	Disable bias current	$0 \text{ V} < V_{DIS} < 7 \text{ V}$	-100		2	μA
V_{REF}	Reference voltage at PROGRAM Pin			2.5		V
T_{JSD}	Junction temperature for thermal shutdown			145		$^\circ\text{C}$

1. The output short-circuit currents are tested one channel at time. During a short-circuit, a large consumption of power occurs, but the thermal protection circuit prevents any excessive temperatures. A safe permanent short-circuit protection is only guaranteed for input voltages up to 16 V.

3 Circuit description

The TDA8139 and the TDA8139/D are dual-voltage regulators with reset and disable functions.

The two regulation parts are supplied from a single voltage reference circuit trimmed by zener zapping during EWS testing. Since the supply voltage of this voltage reference is connected to pin INPUT1 (V_{IN1}), the second regulator will not work if pin INPUT1 is not supplied.

The adjustable voltage of pin OUTPUT2 (V_{O2}) is defined by output bridge resistors ($R1$, $R2$): the values of these resistors are calculated to obtain, with the targetted value for V_{O2} , the reference voltage ($V_{REF} = 2.5$ V) on the median point connected to pin PROGRAM.

The output stages have been realized using a Darlington configuration with a typical dropout voltage of 1.2 V.

The disable circuit will switch off pin OUTPUT2 if a voltage less than 0.8 V is applied to pin DISABLE.

The reset circuit checks the voltage at pin OUTPUT1. If this voltage drops below $V_{O1} - 0.25$ V (4.85 V Typ.), the "a" comparator (Figure 4) rapidly discharges capacitor C_e and the reset output immediately switches to low. When the voltage at pin OUTPUT1 exceeds $V_{O1} - 0.2$ V (4.9 V Typ.), the external capacitor voltage (V_{Ce}) increases linearly to the reference voltage ($V_{REF} = 2.5$ V) corresponding to a reset pulse delay t_{RD} as shown in Figure 5.

$$t_{RD} = \frac{C_e \times 2.5V}{10\mu A}$$

Afterwards, the reset output returns to high. To avoid glitches in the reset output, the second comparator "b" has a large hysteresis (1.9 V).

5 Power dissipation and layout indications

The power is mainly dissipated by the two device buffers. It can be calculated by the equation:

$$P = (V_{IN1} - V_{O1}) \times I_{OUT1} + (V_{IN2} - V_{O2}) \times I_{O2}$$

The following table lists the different R_{thJA} values of these packages with or without a heatsink and the corresponding maximum power dissipation assuming:

Maximum ambient temperature = 70 °C

Maximum junction temperature = 140 °C

Table 5. R_{thJA} values with or without heatsinks

Device	Heatsink	R_{thJA} in °C/W	P_{MAX} in W
TDA8139	No	50	1.4
	Yes	20	3.5
TDA8139/D	No	56 to 40	1.25 to 1.75
	Yes	32	2.2

6.1 Environmentally-friendly packages

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance.

ECOPACK specifications, grade definitions and product status are available at: www.st.com.
ECOPACK is an ST trademark.
