

# Low Cost, Low Noise, CMOS, RRO Operational Amplifiers

## AD8691/AD8692/AD8694

### FEATURES

- Offset voltage: 400  $\mu$ V typical
- Low offset voltage drift: 6  $\mu$ V/ $^{\circ}$ C maximum  
(AD8692/AD8694)
- Very low input bias currents: 1 pA maximum
- Low noise: 8 nV/ $\sqrt$ Hz
- Low distortion: 0.0006%
- Wide bandwidth: 10 MHz
- Unity-gain stable
- Single-supply operation: 2.7 V to 6 V
- Qualified for automotive applications

### APPLICATIONS

- Photodiode amplification
- Battery-powered instrumentation
- Medical instruments
- Multipole filters
- Sensors
- Portable audio devices

### GENERAL DESCRIPTION

The AD8691, AD8692, and AD8694 are low cost, single, dual, and quad rail-to-rail output, single-supply amplifiers featuring low offset and input voltages, low current noise, and wide signal bandwidth. The combination of low offset, low noise, very low input bias currents, and high speed make these amplifiers useful in a wide variety of applications. Filters, integrators, photodiode amplifiers, and high impedance sensors all benefit from this combination of performance features. Audio and other ac applications benefit from the wide bandwidth and low distortion of these devices.

Applications for these amplifiers include power amplifier (PA) controls, laser diode control loops, portable and loop-powered instrumentation, audio amplification for portable devices, and ASIC input and output amplifiers.

The small SC70 and TSOT package options for the AD8691 allow it to be placed next to sensors, thereby reducing external noise pickup.

The AD8691, AD8692, and AD8694 are specified over the extended industrial temperature range of  $-40^{\circ}$ C to  $+125^{\circ}$ C. The AD8691 single is available in 5-lead SC70 and 5-lead TSOT packages. The AD8692 dual is available in 8-lead MSOP and narrow SOIC surface-mount packages. The AD8694 quad is available in 14-lead TSSOP and narrow 14-lead SOIC packages.

See the Ordering Guide section for automotive grades.

## ABSOLUTE MAXIMUM RATINGS

$T_A = 25^\circ\text{C}$ , unless otherwise noted.

Table 3.

| Parameter                            | Rating   |
|--------------------------------------|--|
| Supply Voltage                       | 6 V  |
| Input Voltage                        | $V_{SS} - 0.3 \text{ V}$ to $V_{DD} + 0.3 \text{ V}$ |
| Differential Input Voltage           | $\pm 6 \text{ V}$                                    |
| Output Short-Circuit Duration to GND | Observe derating curves                              |
| Storage Temperature Range            | $-65^\circ\text{C}$ to $+150^\circ\text{C}$          |
| Operating Temperature Range          | $-40^\circ\text{C}$ to $+125^\circ\text{C}$          |
| Junction Temperature Range           | $-65^\circ\text{C}$ to $+150^\circ\text{C}$          |
| Lead Temperature (Soldering, 60 sec) | 300°C  |

Stresses above those listed under Absolute Maximum Ratings may cause permanent damage to the device. This is a stress rating only; functional operation of the device at these or any other conditions above those indicated in the operational section of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

## THERMAL CHARACTERISTICS

$\theta_{JA}$  is specified for the worst-case conditions, that is, the device soldered in the circuit board for surface-mount packages.

Table 4. Thermal Resistance

| Package Type          | $\theta_{JA}$ | $\theta_{JC}$ | Unit |
|-----------------------|---------------|---------------|------|
| 8-Lead MSOP (RM-8)    | 210           | 45            | °C/W |
| 8-Lead SOIC (R-8)     | 158           | 43            | °C/W |
| 5-Lead TSOT (UJ-5)    | 207           | 61            | °C/W |
| 5-Lead SC70 (KS-5)    | 376           | 126           | °C/W |
| 14-Lead TSSOP (RU-14) | 180           | 35            | °C/W |
| 14-Lead SOIC (R-14)   | 120           | 36            | °C/W |

## ESD CAUTION

### ESD (electrostatic discharge) sensitive device.

Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

<sup>1</sup> Z = RoHS Compliant Part.

<sup>2</sup> W = Qualified for Automotive Applications.

## AUTOMOTIVE PRODUCTS

The AD8691W/AD8692W/AD8694W models are available with controlled manufacturing to support the quality and reliability requirements of automotive applications. Note that these automotive models may have specifications that differ from the commercial models; therefore, designers should review the Specifications section of this data sheet carefully. Only the automotive grade products shown are available for use in automotive applications. Contact your local Analog Devices account representative for specific product ordering information and to obtain the specific Automotive Reliability reports for these models.
