

# STGFW30H65FB, STGW30H65FB, STGWT30H65FB

Trench gate field-stop IGBT, HB series  
650 V, 30 A high speed

Datasheet - production data

**Figure 1. Internal schematic diagram**

## Features

- Maximum junction temperature:  $T_J = 175 \text{ }^{\circ}\text{C}$
- High speed switching series
- Minimized tail current
- $V_{CE(\text{sat})} = 1.55 \text{ V (typ.)} @ I_C = 30 \text{ A}$
- Tight parameters distribution
- Safe paralleling
- Low thermal resistance

## Applications

- Photovoltaic inverters
- High frequency converters

## Description

These devices are IGBTs developed using an advanced proprietary trench gate and field stop structure. The device is part of the new HB series of IGBTs, which represent an optimum compromise between conduction and switching losses to maximize the efficiency of any frequency converter. Furthermore, a slightly positive  $V_{CE(\text{sat})}$  temperature coefficient and very tight parameter distribution result in safer paralleling operation.

**Table 1. Device summary**

| Order code   | Marking    | Package | Packing |
|--------------|------------|---------|---------|
| STGFW30H65FB | GFW30H65FB | TO-3PF  | Tube    |
| STGW30H65FB  | GW30H65FB  | TO-247  | Tube    |
| STGWT30H65FB | GWT30H65FB | TO-3P   | Tube    |

1. Energy losses include reverse recovery of the external diode. Turn-on times and energy have been measured applying as freewheeling an external SiC diode STPSC206W

2. Turn-off losses include also the tail of the collector current.

## 4 Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance. ECOPACK® specifications, grade definitions and product status are available at: [www.st.com](http://www.st.com).  
ECOPACK is an ST trademark.
